

## *A compact guide to using Biopuncture for musculoskeletal disorders*

This essential reference is a practical guide to the therapeutic use of Biopuncture in treating musculoskeletal disorders. Written by the founder of biological injection therapy, *Biopuncture* provides detailed discussions of therapeutic techniques, examines indications and contraindications for the use of Biopuncture, and includes practical, step-by-step treatment guidelines that help readers apply key concepts to actual practice.

### **Key Features:**

- Written by the creator of Biopuncture therapy, a practitioner with more than 20 years of clinical experience in the effective application of biological injection therapy
- Includes detailed, highly organized information about a wide range of alternative injection techniques in regenerative medicine, combining current, experience-based information with expert clinical guidance
- Illustrated with more than 200 figures and more than 70 clinical cases
- Expands the interventional treatment options for physicians who care for patients suffering from sports injuries, tennis elbow, carpal tunnel syndrome, sciatica, whiplash, and other musculoskeletal disorders by offering an alternative to cortisone injections

All general practitioners, orthopedists, and physicians treating patients suffering from sports injuries or musculoskeletal pain, will find this book to be an essential resource and reference guide.

**Jan Kersschot, MD**, is in private practice, Antwerp, Belgium.
