

Application

Easyflex can be used during physiotherapy, it can accelerate the metabolism and increase the vitality of cells, reinforcing body resistance to pathogens, relaxing muscles and joints, while activating the flow of energy. Useful for the care of muscles and joints. It also acts as an excellent medium for massage, physiotherapy and acupuncture and is ideal for use before and after sports. Apply when the whole body is fatigued due to physical exercise or heavy physical labour.

Indications

Traumas; sprains; rheumatic pains; aching of muscles, joints and bones; muscle spasms; numbness and tingling of the extremities; fatigue; headache; common cold; and abdominal pain.

Directions

1. Massage the affected area after spraying the embrocation on the skin.
2. Before sports, to help prevent muscle spasm and muscle fatigue, massage the muscles and joints after spraying the embrocation.
3. After sports, apply to relieve fatigue and aid a quick recovery.
4. For refreshment and for bodily fatigue. Use an appropriate amount of the embrocation in hot water and take an immersed bath.

EASY-FLEX

(SHU JIN LU)

舒筋露

EASY FLEX® (SHU JIN LU®)

DESCRIPTION

Easy flex® is a new formulation for trauma and sprains created by a famous Chinese Doctor called, D^r. Cheuk Yin Cheung from Hong Kong. It is a new product which incorporates the merits of Chinese herbs for trauma and arthritis. The product has high permeability and long lasting beneficial effects. It can have an analgesic effect, helping to relieve tendon and joint discomfort by increasing blood circulation and helping to eliminate swellings, bruises and treat infections. It can be applied to contusions, sprains and compressions, numbness in limbs, muscular spasms, sciatic pain, muscle cramp, osteophyte, headache, influenza, nasal congestion, gastro-enteritic bloating etc.

Typical cases

(Supplied by the Manufacturer)

1. An American business man, Robert (aged 56) found it difficult to walk after an ankle sprain. But after spraying Easy Flex® he could walk a few steps. He sprayed his ankle again at night and found significantly increased mobility, enough to enable him to negotiate a flight of stairs.

2. A female worker, Huang Yuying (aged 38) had her right hand fractured by a machine.

After a 12 hour operation, she suffered numbness, swelling, infection and unbearable pain emanating from her right fingers up to her shoulder. There was only slight effect when different types of drugs were used either internally or externally. When Easy Flex® was used, the swelling and the pain were quickly alleviated. Even the sensation in her finger tips returned to normal after some days.

3. A housewife, Wu Tianming (aged 56) suffered from lower back pain and arthritis in the knees. Her lower back and knees hurt and had begun to redden and swell. She also had difficulty walking up and down the stairs. But the symptoms gradually subsided after she applied Easy Flex® 2-3 times a day. A week later she could walk unaided, and climb the stairs.

4. A professor, Lu Fu Shu (aged 59) had relied on analgesic drugs for the relief of his headaches. For a long time he also lost sleep because of pain in his joints. On the recommendation of a friend, he sprayed Easy Flex® over the painful joints and the hollow areas beside his occiput (Feng Chi Xue). He massaged it in for about 15 minutes, relieving the pain. Since the using Easy Flex® he has not required other drugs and has been able to enjoy an uninterrupted sleep.

5. A child, Li Xiaohao (aged 9) suffered from an irritable bowel, diarrhoea, and gastro-enteritic bloating. His parents applied Easy Flex® externally around the area of his liver each day. Within two weeks, his bowel condition improved and the bloating and abdominal pain disappeared

SHU JIN LU

Chinese Herbal Embrocation

Shu Jin Lu® is a unique recipe offered by D^r. Cheuk Yin Cheung of Hong Kong Nan San CO. Through long systematic studies of the formula our facility has succeeded in producing a very effective new Chinese Herbal Embrocation - Shu Jin Lu®- which has long lasting beneficial effects. It has the characteristics of accelerating local blood circulation, increasing the vitality of cells and reinforcing the body's resistance to pathogens
